

Forklift Attachment RFQ Checklist

Enter the details available. Add nameplate, equipment or part photos where useful.

Contact name / company

Email or WhatsApp

Load type / weight (kg) / dimensions (mm) *

Required handling task

Forklift make / model

Year of manufacture *

Forklift serial number

Mast type

Carriage class (ISO 2328 / FEM) *

Fork pockets: width x height / spacing (mm) *

Attachment type / required functions

Attachment rated capacity (kg) *

Auxiliary hydraulic circuits / controls *

Hydraulic couplings / pressure (bar) / flow (L/min) *

* Requested information, not approved technical specifications.

A carriage class or fork-pocket size alone does not establish fitment. Hydraulic functions, mounting and residual capacity need checking for the actual truck and attachment.

Every attachment receives a pre-delivery inspection (PDI) before shipment. PDI follows factory quality standards and includes checks against the order and functional performance. Only equipment that passes inspection is shipped.

This checklist does not constitute a binding quotation.
